Thanks, Karen,
I'll be very interested in reading it, and will provide a review. Hopefully the plan addresses the water quality needs of those in the North Bay and South Bay, as well as those in southern CA.

Subject: Bay Delta

Hi Bruce -

At the end of February, I expect to receive an early administrative draft of the DEIR/S for the Bay Delta Conservation Plan. We'll have a month or so to submit comments. We're scheduled to see another Admin Draft in mid-May and the published DEIR/S in July.

I'd love to get your input on the February draft, and then on the subsequent versions. Unlike in the CalFed analysis, drinking water has not been a focus of the analytical work of the BDCP (so far as I've seen). I suspect this is because the BDCP proponents would be expected to get substantially improved water quality. I want to make sure our review takes into account the in-Delta intake issues (NBA, CCWD).

I've copied Stephanie as our new lead reviewer in ERO, and Erin as our staff lead in Water for the BDCP. -
